

27 August 1953

MEMORANDUM FOR: Colonel White

SUBJECT : Logistics Office Memorandum on Audit
Report - Special Stock Account No. 2

1. The attached presents the Logistics Office answers and what they are doing to comply with the problems raised in the Audit Report. In most instances the answers while indicating progress and action are not definitive. Technical examples of the way some are left hanging are as follows.

- a. The contract is being renegotiated in the interest of better terms.
- b. We do not anticipate any unusual difficulty before completion.
- c. A physical count is presently being made.
- d. Further work is being done to reconcile the records of the two branches.

2. In view of this and as the account is still active and corrective action is not complete, it is recommended that Logistics be advised to render a follow-up report on this matter in three or four months.

3. A proposed memorandum to the Logistics Office is attached.
